

# Care and Maintenance

---

A guide to caring for your Caesarstone

## Everyday cleaning

Caesarstone requires very little maintenance to stay looking like new. For everyday, routine cleaning of Caesarstone we recommend wiping the surface with warm soapy water (a mild detergent) and a damp cloth, or use one of our convenient Caesarstone cleansers. As Caesarstone is virtually non-porous, it will keep its lustrous gloss and ultra smooth surface without polishing and it never needs sealing. Never attempt to polish the surface on your own, and avoid prolonged rubbing in one spot when cleaning.

## Tough? Yes. Indestructible? No.

As with any surface, Caesarstone can be permanently damaged by exposure to strong chemicals and solvents that undermine its physical properties. Do not use products that contain trichloroethane or methylene chloride, such as paint removers or stripper. Avoid any highly aggressive cleaning agents like oven cleaner and products that have high alkaline/pH levels. Should the surface be accidentally exposed to any of these damaging products, rinse immediately with water to neutralize the effect.

## Heat resistance

Caesarstone will tolerate brief exposures to moderately hot temperatures, however prolonged direct contact with, or radiated heat from, very hot pots can cause thermal shock, discolouration or damage. We therefore do not recommend placing hot items directly from the hotplate or out of the oven onto the Caesarstone surface. We always recommend the use of a hot pad or trivet to place hot items on.

## Caesarstone cleaning products

Caesarstone has developed a range of cleaning products specially designed and formulated to keep your quartz surfaces looking their best. Our cleaning products are available to purchase from all ISS branches. You can also buy them from our online store at [caesarstone.co.za](http://caesarstone.co.za).

## Food preparation

We always recommend cutting on an appropriate cutting board and never directly on the Caesarstone surface to avoid blunting kitchen knives or damaging the surface.

## Extra stubborn marks

If you have an extra stubborn mark which can't be removed with **Caesarstone Cream Cleanser**, don't panic! Simply contact our Caesarstone customer support team at 083 608 5810 who will be able to provide you with further cleaning advice for your specific type of mark.

### Activate your Lifetime Warranty

Register online and receive your complimentary Caesarstone Cleaning Kit and a stainless steel Caesarstone Authenticity Badge. For more information on the Lifetime Warranty, and how to register, [scan the QR code](#) or visit [caesarstone.co.za](http://caesarstone.co.za).

## Directions for use

For general cleaning we recommend our Caesarstone Spray Cleaner. For effortless, quick clean-ups, try the new Caesarstone Surface Wipes. For removal of extra stubborn marks, such as red wine or beetroot, or to give your surface a thorough clean, we recommend Caesarstone Cream Cleanser.

Apply a generous amount to the counter top and use a damp, NON-SCRATCH, all-purpose sponge or a soft, damp cloth. Gently scrub the mark in a circular motion, adding more warm water if necessary while being careful not to rub in one spot for too long. Use the scrubber to clean the entire surface before rinsing with more water and buffing the surface dry with a soft, clean towel.

Caesarstone Cream Cleanser is also suitable for cleaning sinks and taps, baths and basins, shower recesses, tile surfaces and kitchen surfaces.
